NFB

1. I looked at one here at Tractor supply- its approximately 10X20. \$300.00 or so. I can go purchase that this evening if we are in agreement.

Good Morning.

I would like both of your take on proposed schedule for upcoming work at NFB and HTC. Then on Friday we can discuss with Lyndsey.

NFB

1) We need to obtain and set up car port for warm zone at front office if we are to saw cut concrete on Saturday afternoon and/or Sunday. If not, we won't work Sunday. Kevin, have you looked into obtaining this structure?

2) Peter, do we have sample results for hot zone and background flooring concrete?

3) Please let me know if John says anything else about AC. I would like to contact his brother Bill and try to nip in the bud.

HTC

- 1) I will follow up with John At Area 5 residence to see if system electricity is installed and operating. We need to perform post mitigation radon canister sampling
- 2) We will need to plan some soil sampling in the yard. I would like to be bias with this along the known pathway of old road through his yard. John and I spoke about this during the radon system installation. He also mentioned to Kevin later in the day.
- 3) Mike Basile attended a Town of Lewiston Environmental Commission Meeting on Monday. The chair person asked that we consider doing more residential testing to the west of the fenced off area (Roberts Street). My initial take us to do gamma survey only. There is no indication that the slag was deposited there.
- 4) The commission also requested a copy of the DOE over flight photos that were taken in 1978. Peter, can you work on obtaining this?

Anything else?

Thanks

Regards,

Eric
